WE CLAIM:

-1-,

A method for inhibiting cyclooxygenase or prostaglandin H synthase enzymes which comprises:

providing at least one compound isolatable from a cherry with at least one of the enzymes to inhibit the enzymes.

-2-

A method for inhibiting cyclooxygenase or prostaglandin H synthase enzymes which comprises:

10

providing at least one bioflavonoid compound isolatable from a cherry with at least one of the enzymes to inhibit the enzymes.

-3-

vivo.

-5-

The method of any one of Claims 1, 2, 3 or 4 wherein the compound is from a tart cherry.

-6-

The method of any one of Claims 1, 2, 3 or 4 wherein the compound is from a sweet cherry.

A method for inhibiting inflammation in a mammal which comprises:

administering at least one compound isolated from a cherry to the mammal to inhibit inflammation.

1

The method of Claim 7 wherein the mammal is human.

The method of any one of Claims 7 or 8 wherein the compound is from a tark cherry.

The method of daim 7 wherein the compound is from a sweet cherry.

-10-

A method for inhibiting inflammation in a mammal which comprises:

administering at least one bioflavonoid compound isolatable from a cherry to the mammal to inhibit the inflammation.

The method of Claim 11 wherein the compound is from a tart cherry.

-12-

The method of Claim 11 wherein the compound is from a sweet cherry.

-13-

The method of Claim 11 wherein the mammal is human.

-14-

The method of Claim 1 wherein the compound is contained in a composition which comprises a dried mixture of isolated anthocyanins, bioflavonoids and phenolics from cherries and a food grade carrier.

-16-

The method of Claim 15 wherein the carrier is dried cherry pulp.

10

5

The method of Claim 15 wherein the ratio of dried mixture to carrier is between about 0.1 to 100 and 100 to 0.1.

15

The method of any one of Claims 1, 2, 3 or 4 wherein the compound is incorporated into a food.

20

The method of Claim / 7 wherein the compound is incorporated into a food.

-19-

25

The method of Claim 11 wherein the bioflavonoid is incorporated into a food.

A method for inhibiting inflammation in a mammal which comprises:

. 30

administering anthogyanin including cyanidin to the mammal to inhibit inflammation.

35

The method of Claim 21 wherein the anthocyanin is isolated from a tart cherry.

-22-

The method of Claim 1 wherein the anthocyanin is isolated from a sweet cherry.

5

-24

The method of Claim 21 wherein the mammal is human.

10

The method of any one of Claims 21, 22, 23 or 24 wherein the anthocyanin is incorporated into a food.

-26

The method of claim 21 wherein the anthocyanin is essentially pure.

15

The first two objects of the control of the first tree trees that the first trees that
